

PRINTABLE AREA

THE SIZE OF YOUR DESIGN DEPENDS ON YOUR SMALLEST GARMENT

The size of your design will depend on the smallest garment in your order. While keeping your design in proportion, we will set your imprint size to either the maximum height or width of the smallest garment in your order.

LARGER SHIRTS = LARGER PRINT AREA

The printable area on each shirt progressively gets larger with each shirt size. The below example has a 9" wide by 9" tall design placed on shirts ranging from youth—extra small to adult XXL. As you can see below, the image looks different depending on the size of the shirt.

LARGER SCREENS FOR LARGER SIZES

Consider ordering separate screens for each apparel size if you'd like to keep the image proportion the same across all sizes.
